Q&A Session for Math Majors

Dr. Kevin Costello

Math Club will be a discussion/Q&A session about the Math Majors and courses at UCR. If you have questions or want to know more about how the major works or what's covered in various courses, this meeting's for you. Alternatively, if you're most of the way through the major and have some perspective you want to provide, this is a great opportunity for that too. We'll have some recent graduates as well to give their side of things.

Hope to see you there!
