## MATH 006A <br> Precalculus: An Introduction to Functions 1

## Course Description

Develop and refine quantitative reasoning, covariational reasoning, problem solving, and algebraic proficiency in preparation for calculus. Topics include functions, properties of functions, ways to create new functions, and modeling real-world situations with functions. Specific functions covered include linear, exponential, and logarithmic functions.

## Prerequisites

MATH 003 or MATH 06LA, may be taken concurrently; the Mathematics Department determines the study program pathway based upon the score on the Mathematics Advisory Examination; or consent of instructor.

## Textbook

Precalculus: Pathways to Calculus: A Problem Solving Approach (8th edition) by Carlson, Oehrtman, \& Moore

Suggested Lecture Schedule (50-minute lectures)

| Lecture \# | Textbook Section(s) |  |
| :---: | :--- | :--- |
| 1 | 1.1 | Representational Equivalence |
| 2 | $1.3,2.1$ | Quantities: Modeling in word problems |
| 3 | $2.1,2.7$ | Quantities: Bounding with absolute value (in)equalities |
| 4 | 2.1 | Quantities: Co-variation and the Rule of Four |
| 5 | 2.2 | Changes in Quantities and Constant Rate of Change |
| 6 | 2.3 | Constant Rate of Change and Linear Functions |
| 7 | 2.4 | Constant Rate of Change and Linearity |
| 8 | $2+$ | Solving Systems of Linear Equations (not in book) |
| 9 | Module 2, 3.1 | M2 Review, Box Problem |
| 10 | $3.1,3.2$ | Box Problem and Modeling Function Relationships |
| 11 | 3.2 | Function Relations and Domain of Functions |
| 12 |  | Midterm (if not proctored, move schedule up and extend <br> logarithm discussion) |
| 13 | 3.3 | Using and Interpreting Function Notation |
| 14 | 3.4 | Function Composition in context |
| 15 | 3.5 | Function Composition (Practice) |
| 16 | 3.6 | Inverse Functions |
| 17 | $3+$ | Transformation: Stretch, shift, flip (not in book) |
| 18 | Module 3, 4.0 | M3 Review, Exponents - Skills and Procedures |
| 19 | 4.1 | The Meaning of Exponents |
| 20 | $4.2,2.5$ | Comparing linear and exponential functions, Speed |
| 21 | 4.3 | 1-unit Growth \& Decay Factors |
| 22 | 4.6 | Compounding Periods \& Compound Interest Formula |
| 23 | Module 4 | Review: Exponential functions |

| 24 | $4+$ | Graphs of exponential functions and their inverses, <br> Motivate $e$ (not in book) |
| :--- | :--- | :--- |
| 25 | 4.8 | The Inverse of an Exponential Function |
| 26 | Module 4 | Review: Exponentials, Logarithms, and relating them |
| 27 | 4.9 | Solving Logarithmic Equations |
| 28 | 4.9 | Solving Logarithmic Equations |
| 29 | Modules 1-4 | Review |
| 30 |  | Review (note: at least one day of class is missed most <br> quarters for a holiday) |
